Time Your Ride - Lapping days at Evergreen Speedway On an Autocross type track

Track

The track is an autocross stile track, we are using this stile to keep the speeds down for safety. The idea of this track is to help people learn how to drive corners and keep control of their cars. We use traffic cones to mark the track. The track is open rain or shine

Sign in and Track entry

Each person will check in at the Speed Way offices, which is located on the west side of the fair grounds. Each driver must pay \$50 and get a wristband on their left wrist, also a number card for your car window. Each pit person or ride along will need a pit pass, which are \$15 and a wristband on his or her right wrist. You can rent a transponder at this point, rental is \$15 plus a deposit. Enter the track at the north end of the grandstand, turn left and drive to the pits

Tech

The car will be gone through per a checklist. If the car passes, the driver or drivers will get a number that will be wire tied to the driver's rear mirror. This is the order you will run in.

Tech list

Any car can be used and no roll bar is required

Check engine compartment for anything loose. Battery must have a strap

Check the driver compartment for anything loose. No water bottles, floor mat or anything else that can come loose.

Check under the car to make sure there is nothing hanging loose. In general is the car safe to drive.

Helmet for the driver and passenger when on the track

Starting order

You will line up per your number and run in that order. If someone does not want to run when it is there turn they need to pull out of line. When they are ready to run they will be reinserted into their run order.

Entering the track

When the track is clear the starter will give you the go a head to enter the track to start your four-lap run. Depending on the number of cars present there may be others cars on the track. If you came up to another car slow down there is NO passing.

Leaving the track

To leave the track go strait past the first turn and on to the 5/8 at turn one. Remember that 5/8 and pit speed is 10mph.

We are limited to 60 drivers and we reserve the right to refuse the track to anyone.
